## AMERICAN GEMS OUTPUT GROWS

Total Yield of Precious Stones  
Last Year More Than  
\$300,000

WASHINGTON, July 28.—American  
mines in 1911 yielded \$2700 worth dia-  
monds, \$9500 worth of emeralds, \$215-  
\$313 worth of sapphires and \$44,751  
worth of turquoises, according to fig-  
ures just compiled by the United  
States geological survey. The total  
output of precious stones in the United  
States last year was valued at  
\$343,692; the production in 1910 was  
valued at \$245,380. The output in-  
cluded gems valued at \$100 to \$200  
per carat, and equal in quality to the  
average run of the emeralds from  
South America. In three years one  
locality in North Carolina has yield-  
ed gems worth \$10,500.

Much interest has lately been  
aroused in the moss agates found in  
Montana. The cut gems consist of  
stones suitable for use in brooches,  
stick pins, watch fobs, belt buckles  
and other ornaments. The gems cut  
mocha stone command good prices,  
bringing anywhere from \$1 to \$200 or  
\$300 apiece. Some of the smaller  
stones suitable for stick pins, if the  
mossy or fernlike patterns are particu-  
larly delicate and beautiful, bring  
\$25 each.

Most of American diamonds come  
from Arkansas and California. The  
most important find of the year in  
Arkansas was an 8.1-8 carat white  
diamond—the largest diamond so far  
found in the State. Another white  
diamond, of 3.44-64 carats, was also  
found.

The largest emerald so far discov-  
ered in North Carolina measured  
about 1 inch by 3-4 of an inch by 1-2  
inch. It was about half of a crystal  
split parallel with the length. This  
piece has been cut into about 20  
gems, the largest of which weighs  
about 3 carats.

Considerable business in gems is  
done among tourists along the coast of  
California and Oregon, the beach peb-  
bles having peculiar textures, odd  
markings and pleasing colors. Some  
of these stones have been described  
in terms relative to characteristic fea-  
tures, such as "enchythol," "flower  
stone," "wire agate," "fish egg" and  
"Japanese stone." One company in  
Avalon, Cal., has been engaged in cut-  
ting these stones for several years.  
The stone is obtained in all sizes,  
from cobbles over six inches thick to  
small pebbles. The tourists also col-  
lect these pebbles to carry off as sou-  
venirs, either polished or in the  
rough.

## BOWEL COMPLAINT IN CHILDREN

Children when teething are liable to  
attacks of diarrhoea and this trouble,  
especially in warm weather, should  
never be neglected. The best medi-  
cine in use for ailments of this kind  
is Chamberlain's Colic, Cholera and  
Diarrhoea Remedy. When reduced  
with water and sweetened, it is not  
unpleasant, which is of great impor-  
tance when giving medicine to chil-  
dren. For sale by all dealers. Ben-  
son, Smith & Co., agents for Hawaii.

Getters.

## DREAD DISEASE IN CALIFORNIA

Government Tries to Find the  
Source of Spotted Fever

Rocky mountain spotted fever, dead-  
ly disease of the western states, and  
distinctly American, has broken out in  
California, according to a report receiv-  
ed at the public health and marine  
hospital service here from the Califor-  
nia state board of health, says the  
Washington Star.

This disease, which appears to have  
originated in the Rocky mountain  
states and which has never been traced  
to foreign sources as have other  
scourges which have visited this coun-  
try, besides its death-dealing capacity  
may have disastrous effects commer-  
cially. The United States public  
health and marine hospital service is  
doing everything in its power to learn  
the causes of the disease and how to  
prevent its spread.

The disease has been found in its  
most violent form in Montana, where  
the death rate among those afflicted  
runs as high as 75 per cent. In Idaho,  
on the other hand, the disease has a  
far lower death rate, about 4 or 5 per  
cent. In one year as many as 300  
cases have been recorded in Montana.  
Describes The Scourge.

Assistant Surgeon General William  
Colby Rucker of the public health and  
marine hospital service, at present in  
Washington, spent some time last  
summer in Montana studying this  
strange disease. In an interview yester-  
day he gave the following description  
of the scourge:

"The other day a case of Rocky  
mountain spotted fever was reported to  
the public health and marine hospital  
service by the state board of  
health of California. This is the sec-  
ond case which has been reported from  
that state, and brings to mind  
one of the most interesting diseases  
which afflicts man, and the only one  
which is distinctly American.

"Rocky mountain spotted fever has  
been known to exist in many of the  
states from Montana to New Mexico,  
and thence westward, for a great  
many years. Tradition has it that the  
Indians recognized it and understood  
its seasonal prevalence. The disease  
is found in a good many fertile val-  
leys, which the Indians used for rais-  
ing their crops, and it is said that they  
would go into the valley early in the  
spring, plant their crops before the  
appearance of the tick which carries it,  
and not return for the harvest until  
this dangerous insect had gone into  
the resting stage.

Study of Disease Begun.

The attention of the medical world  
was first drawn to this strange malady  
by the report of a series of cases in  
Idaho in 1896. It was not until 1902,  
however, that the active study of the  
disease was begun. And since that  
time many of America's foremost  
scientists have endeavored to solve  
the riddle of this mysterious disease.  
For the last two years the United  
States public health and marine hospi-  
tal service has had officers in the  
field making an intensive study of the  
means of its prevention and control.

"What is this strange disease? Why  
is it that the causes have not been dis-  
covered? And why it is so important  
to the people of the United States that  
it be eradicated?

"Rocky mountain spotted fever is  
an acute disease in which there is a  
continuous, moderately high fever,  
severe pains in the muscles and joints  
and a breaking out of the entire body  
in little purple spots.

"It occurs during the summer  
months, during the time that ticks are  
prevalent, and practically all of the  
patients are bitten by ticks.

"The disease is peculiar in that it  
has the habit of localizing itself on  
one side of a valley, and, also, in that  
while the disease is very fatal in Mon-  
tana, it has a low mortality in Idaho  
and the rest of the western states.

"It is important that this disease be  
studied and wiped out, not only be-  
cause it causes human suffering and  
death, but, also, for the reason that  
it does a great deal of harm to the  
infected sections. For example, the  
Bitter Root valley of Montana, one of  
the most fertile and well watered val-  
leys of the world, has this disease on  
its western side. On the eastern side  
of the valley, a section not more fer-  
tile nor better watered, land is worth  
from \$500 to \$1000 per acre, while the  
disease has existed for several years,  
can be purchased for a fourth of those  
amounts.

Description of Tick.

"The tick, which plays the malevol-  
ent role of the transmitter of the dis-  
ease, is much like the wood tick of  
the eastern sections of the United  
States. It is a six-legged insect, and  
is provided with an elaborate biting  
and holding apparatus. Apparently it  
may transmit the disease to its young,  
and it may be that in this way the  
source is perpetuated.

"During its earlier cycle of develop-  
ment it is found on small animals such  
as ground squirrels and weasels, but  
in its adult stage, it is usually found  
on cattle and horses.

"The ticks are more or less oval in  
shape, and have a mottled shield or  
shell extending down over their backs.  
They breathe through a pair of con-  
ch-shaped openings situated just behind  
the rear legs. The head supports the  
biting and holding apparatus. The lat-  
ter is a very ingenious arrangement,  
consisting of two halves, and looking  
somewhat like the cake called in com-  
mon parlance a lady finger. The outer  
surfaces are covered with small curv-  
ed hooks, several hundred in number.  
After the hole has been punctured in  
the skin, this clinging apparatus is  
thrust in, with the two halves lying  
close to each other. After they get in  
they are spread apart, and by means  
of the hooks the tick is able to hang  
on indefinitely. This is the reason  
why it is so hard to get a tick of with-  
out leaving its head buried in the skin.

## UNABLE TO SELL AUSTRALIA DAIRY BUTTER IN HAWAII

Australia is unable to sell her but-  
ter in Hawaii or the United States but  
is forced to export it to Canada, on  
account of the stringent rules made  
by the board of agriculture forbidding  
the use of preservatives in the man-  
ufacture of dairy products.

This statement was made to Secre-  
tary Super of the Y. M. C. A. last  
night by J. G. Harkness, secretary of  
the Wellington, New Zealand, Y. M. C. A.,  
and one of the largest dairymen  
in New Zealand. Harkness, who has  
been on a trip to Victoria, B. C., was  
a passenger on the Marama last night  
and paid a visit to the local Y. M. C. A.  
The Australian dairymen is on his  
way to Australia and is returning  
from Canada, where he has been mak-  
ing arrangements for the sale of his  
dairy products for which he declares  
he is unable to find a market in the  
United States or Hawaii.

"This is due to the regulations  
made by the United States agricul-  
tural department forbidding the use  
of preservatives in the manufacture of  
butter," said Harkness yesterday even-  
ing.

"We have had several shipments  
sent back to us by the Honolulu food  
inspectors and are forced to send our  
products to Canada, where they find a  
ready market. The use of preserva-  
tives is an essential in manufacturing  
butter which is to be shipped any dis-  
tance and does no harm to the prod-  
uct.

"Many of our dairymen have agreed  
to ship no more butter to Hawaii or  
the United States on account of these  
regulations, and instead shall sell our  
products in Canada, where there is a  
big market for them."

## FUNERAL SERVICES FOR W. C. WEEDON ON SUNDAY

The funeral of the late Walter C.  
Weedon will be held on Sunday. The  
body will rest at the undertaking par-  
lor of M. E. Silva, Chaplain lane, from  
8:30 a. m. to 2 p. m., where it may  
be viewed by friends.

The funeral services will be held at  
the Christian Church, Alakea and  
King streets, at 2:30 p. m. Follow-  
ing the close of the service the body  
will be returned to the undertaking  
parlor for later interment.

Resolutions were adopted yesterday  
by a committee of the Young Men's  
Christian Association extending sym-  
pathy for the widow and a tribute to  
the late Walter C. Weedon, who was  
one of the founders of the Young  
Men's Christian Association of Hono-  
lulu. The committee consisted of  
Captains Isiah Bray, W. G. Hall and  
C. J. Day. Captain Bray, the chair-  
man, was the first general secretary  
of the association.

## LEGAL NOTICES.

IN THE CIRCUIT COURT OF THE  
First Circuit, Territory of Hawaii.—  
In the matter of the Estate of Ernest  
Cummings, a Minor. On reading and  
filing the Petition of J. Alfred Mac-  
goun, guardian of said Ernest Cum-  
mings, a minor, praying for an order  
of sale of certain real estate belonging  
to his ward, situate on the islands of  
Molokai, Maui and Oahu, as per list  
on file, and setting forth certain legal  
reasons why such real estate should  
be sold; It is hereby Ordered, that the  
heirs and next of kin of said minor  
and all persons interested in the said  
estate, appear before this Court on  
Monday, the 26th day of August, A.  
D. 1912, at 9 o'clock a. m., at the  
courtroom of this Court, in the City  
of Honolulu, then and there to show  
cause why an order should not be  
granted for the sale of said estate. By  
the Court: J. A. DOMINIS, Clerk.  
Dated, Honolulu, August 2, 1912.  
5304—Aug 2, 9, 16, 23

## BY AUTHORITY.

SALE OF A GENERAL LEASE OF  
THE GRAZING LANDS OF NANA.  
KULI, WAIAE, OAHU.

At 12 o'clock noon, Saturday, Au-  
gust 24, 1912, at the front door to the  
Capitol, Honolulu, there will be sold  
at public auction, under Part V. of the  
Land Act of 1895, Sections 278-285 in-  
clusive, Revised Laws of Hawaii, a  
general lease of the grazing lands of  
Nanakuli, Waianae, Oahu, containing  
an area of 2350 acres, more or less.

Upset rental, \$750 per annum; pay-  
able semi-annually in advance.

Term of lease, 15 years from Sep-  
tember 1, 1912.

This lease will contain conditions re-  
garding the termination of the lease  
after ten years, construction of fences,  
development of water, the cutting of  
algaroba trees on certain areas, and  
certain other conditions.

The purchaser shall pay the cost of  
advertising.

Reservations regarding land required  
for agricultural, homestead, reclama-  
tion, settlement or public purposes will  
be embodied in this lease.

Persons desiring to object because  
these lands should be homesteaded or  
otherwise, are requested to present  
such objection to the Board of Public  
Lands, in person or in writing, on or  
before Wednesday, August 14, 1912.

For maps and further particulars,  
apply at the office of the Commissioner  
of Public Lands.

JOSHUA D. TUCKER,

Commissioner of Public Lands.  
Dated at Honolulu, July 18, 1912.  
5292—July 19, 26; Aug 2, 9, 16, 23

## MAUI LOAN FUND COMMISSION.

Sealed Tenders will be received at  
the office of the Maui Loan Fund  
Commission, at Wailuku, Maui, T. H.,  
until Saturday, September 14, at 10  
o'clock a. m., for constructing, and  
furnishing all labor, tools, equipment  
and material, except all pipe and fit-  
tings, necessary to construct, in ac-  
cordance with the plans and specifica-  
tions, a reservoir at Keoken, Kula, Is-  
land of Maui, T. H., of a capacity of  
approximately 500,000 gallons.

Plans and specifications and other  
information may be had upon applica-  
tion to the Maui Loan Fund Commis-  
sion, or at the office of the Superin-  
tendent of Public Works, at Honolulu,  
T. H.

The right is reserved to reject any  
and all bids.

Tenders must be made on forms fur-  
nished by the Maui Loan Fund Com-  
mission, and must be accompanied by  
a certified check amounting to not  
less than 5% of the amount of the ten-  
der.

W. F. POGUE,

Vice Chairman, Maui Loan Fund Com-  
mission. 5312-4w

## MAUI LOAN FUND COMMISSION.

Sealed Tenders will be received at  
the office of the Maui Loan Fund  
Commission, at Wailuku, Maui, T. H.,  
until 10 o'clock a. m., Saturday, September  
14, for constructing a One-Story Frame  
Building to be used as a schoolhouse  
at Hana, Maui, T. H., to be built for  
the Territory of Hawaii, according to  
plans and specifications, and under the  
supervision of the Maui Loan Fund  
Commission.

Plans, specifications and other in-  
formation may be had upon applica-  
tion to the Maui Loan Fund Commis-  
sion or at the office of the Superin-  
tendent of Public Works, at Honolulu,  
T. H.

The Maui Loan Fund Commission  
reserves the right to reject any and  
all bids.

Tenders must be made on forms fur-  
nished by the Maui Loan Fund Com-  
mission, and must be accompanied by  
a certified check in amount equal to  
5% of the tender.

W. F. POGUE,

Vice Chairman, Maui Loan Fund Com-  
mission. 5312-4w

## MAUI LOAN FUND COMMISSION.

Sealed Tenders will be received at  
the office of the Maui Loan Fund  
Commission, at Wailuku, Maui, T. H.,
